TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL, Python, C
Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS
Backend Technologies: Node.js, Express.js, REST APIs
Databases: MySQL, MongoDB
Developer Tools & Platforms: Git, GitHub, Databricks, VS Code, IntelliJ IDEA, Postman

PROJECTS

- AdGen AI** | *React.js, Node.js, Express.js, PostgreSQL, Gemini API, Cloudinary* *Aug. 2026 – Present*
- Engineered a full-stack AI-powered web application that generates UGC-style advertisement images and videos using Google Gemini API, supporting image and video generation from 2 user-uploaded inputs.
 - Developed secure REST APIs with Express.js and PostgreSQL, implementing Clerk authentication, 3 subscription plans, credit-based usage tracking, and project management.
 - Integrated Cloudinary for media storage with image upload, generation history, preview, and download features.
- CertifyHub** | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, PDF-Lib* *Jul. 2026 – Aug. 2026*
- Constructed a full-stack certificate management platform enabling organizers to create events, upload certificate templates, and Generated 50+ certificates in a single batch with optimized PDF generation and CSV parsing.
 - Implemented JWT-based authentication, role-based access control, CSV participant upload, and automated PDF generation using PDF-Lib for secure and scalable certificate generation.
 - Designed organizer dashboards for event management, certificate preview, bulk download, and email-ready workflows, reducing certificate generation time from 30+ minutes to under 2 minutes.
- PRISM** | *React.js, Node.js, Express.js, MySQL* *Aug. 2025 – Dec. 2025*
- Designed PRISM, a web-based hostel complaint and maintenance tracking system enabling 3 user roles, digital complaint submission, and secure OTP-based authentication for verified user access.
 - Implemented role-based dashboards for Students, Wardens, and Chief Wardens, allowing students to raise complaints and enabling automated escalation of unresolved issues after 3 days.
 - Integrated email notifications, CSV report downloads, and complaint deletion based on month and year across 3 user roles for organized tracking and administrative control.

EXPERIENCE

- Web Development Intern** | **3Skill** *Mar. 2026 – Apr. 2026*
- Crafted Student Management System (SMS) with CRUD functionality and database integration for efficient student record management.
 - Built and integrated RESTful APIs, collaborated using Git/GitHub, and contributed to testing and debugging the application.

EDUCATION

Canara Engineering College, Mangalore, India *Sep 2023 – Present*
Bachelor of Engineering in Computer Science **SGPA: 9.22**
Government PU College for Girls, Car Street, Mangalore *Jun 2021 – Mar 2023*
Pre-University Course (PCMB) **Percentage: 94%**

ACHIEVEMENTS

- Bengaluru AI Hackathon 2026:** Selected among the **Top 5 Finalists** in the UI Experience for AI-First Applications domain for developing **Sahaay AI**. (*Apr 2026*)
- Inceptio Ideathon:** Secured **Top 7 among 52 teams** and for presenting **ResueSync – an Offline Emergency Triage System**. (*Feb 2026*)
- Technical Workshops:** Conducted SQL Data Cleaning and Git/GitHub sessions for **30+ students**. (*Nov 2025*)
- Leadership:** Class Representative (CSE A), Library Student Coordinator, and Training Student Coordinator. (*2024–Present*)

COURSES AND CERTIFICATES

- Complete Web Development Bootcamp (Udemy):** Completed a full-stack web development course covering React, HTML, CSS, Tailwind, Node.js, MongoDB, and deployment.
- Java Programming – Infosys Springboard:** Completed comprehensive training in Java covering object-oriented programming, exception handling, collections, file handling, and application development.
